

T.Y. B.Tech. (Computer Science & Engineering)
(Semester- V)
END SEMESTER EXAMINATION, DECEMBER- 2021

Course Code : UCSE0501

Course Name : Computer Algorithms

Day and Date : Thursday , 23-Dec-21

Time : 09:30 AM To 11:30 AM

PRN :

Max Marks: 50

Instructions:

IMP: Verify that you have received question paper with correct course, code, branch etc.

- i) All questions are compulsory.
- ii) Figure to the right indicate full marks.
- iii) Assume suitable data wherever necessary.

Q.1 Attempt any Two
A

Marks B.L CO's

16
8 1 3

Find minimum cost of path from S-T is the multistage graph of following figure. Use both forward and backward reference method.

$$\begin{aligned} d(1,9) &= \min \{ 5 + d(2,9), 2 + d(3,9) \} = \{ 5 + 8, 2 + 11 \} = 13 \\ d(2,9) &= \min \{ 3 + d(4,9), 3 + d(6,9) \} = \{ 3 + 4 + 3, 3 + 1 + 7 \} = 10 \\ d(4,9) &= \min \{ 1 + d(7,9), 4 + d(8,9) \} = 1 + \end{aligned}$$

12

$$= n^2 \log n$$

$$= n^2$$

- B Solve the following recurrence relation
- $T(n) = 4T(n/2) + n^2$
 - $T(n) = 3T(n/2) + n^2$
- Using Master theorem.

$$T(n) = aT(n/b) + f(n)$$

$a=4, b=2, \log_2 4 = 2, c=2$

$\log_b a = \log_2 4 = 2, c=2 \rightarrow \text{Case 2}$

$\log_b a = \log_2 3 = 1.5, c=2$

$\log_b a < c = 2$

$n^{\log_b a} = n^{\log_2 4} = n^2$

$n^2 \log n$

C

Apply travelling salesman problem using dynamic programming, discuss algorithm and complexity.

$A \rightarrow C \rightarrow D \rightarrow B$

Q.2 Attempt any two

$1 \rightarrow 3 \rightarrow 5 \rightarrow 8 \rightarrow 15$

- A Consider 5 items with their respective weights and profits, weights= $\langle 5, 10, 20, 30, 40 \rangle$ and profits= $\langle 30, 20, 100, 90, 160 \rangle$. The capacity of knapsack $M=60$. Find the solution using greedy method to the fractional knapsack.

B

Solve above graph example using Floyd Warshall's all pair shortest path algorithm.

- C What is the solution generated by greedy solution to job sequencing with deadline problem when $n=7$ (P_1, \dots, P_7)= $(3, 5, 20, 18, 1, 6, 30)$ (d_1, \dots, d_7)= $(1, 3, 4, 3, 2, 1, 2)$

$$z = 36 + 38$$

$$= 74$$
