OS Booting Process

 The PC is turned on & the BIOS initializes the hardware.

BIOS

MBR

 The BIOS calls code stored in the MBR at the start of disk 0. The MBR loads code from the bootsector of the active partition.

Active Partition

Bootloader

 The bootsector loads & runs the bootloader from its filesystem.

Master Boot Record

Bootstrap Code

Partition Table

Partition 1

Partition 2 | Partition 3 |

Partition 4

Boot Signature

Bootstrap Code End of Sector

(Ox55
OxAA)

 Once the bootloader is finally executed, it loads its configuration/ database from files on the same partition.

Bootloader

Boot Menu

 The bootloader optionally presents the user with a list of operating systems as loaded from the configuration file. The bootloader locates and loads the kernel for the selected OS from the disk, and hands-off control of the PC to the OS.

> Operating System Kernel

Thankyou
